Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance: increasing a period of sending messages to the target message box based upon a delivery failure message therefrom, and thereafter decreasing the period of sending messages to the target message box based upon a successful delivery of a message thereto.

Examiner agrees with appellant's arguments that both prior art fails to teach an aggregation module that increases a period of sending messages to the target message box based upon stored delivery failure information therefor, and thereafter decreases the period of sending messages to the target message box based upon a successful delivery of message thereto (see Appeal Brief, Page 10, Section B, filed February 28, 2006).
